DEPARTMENT OF THE ARMY US ARMY INFORMATION SYSTEMS SOFTWARE CENTER EXECUTIVE SOFTWARE SYSTEMS DIRECTORATE FORT BELVOIR, VIRGINIA 22060-5576

AMSEL-SE-IS-C DATE: 29 December 1999

MEMORANDUM FOR DAMIS USERS

SUBJECT: Software Version Description (SVD) for Installation Support Module (ISM) Drug and Alcohol Management Information System(DAMIS) Interim Change Package (ICP) P6A-AVM-11-01

- 1. Enclosed is ICP P6A-AVM-11-01 that provides a formal change to the Drug and Alcohol Management Information System (DAMIS) ISM.
- 2. Acknowledgement of installation of this ICP must be made IAW instructions provided in Enclosure 1.
- 3. This memorandum certifies that the ISM subject software has been thoroughly tested, is considered to be a quality product, and is hereby authorized for release to a production environment.
- 4. Security Implications: NONE.

	3.4 3.5 3.6	3.3.3 Summary of Changes
	3.7	Users
4.		Notes

1. Scope.

- 1.1 Identification. This Software Version Description (SVD) applies to the Drug and Alcohol Management Information System (DAMIS) running on Army Standard Information Management System (ASIMS) and networked AIX operating system on UNIX platforms.
- 1.2 System Overview. DAMIS is part of the ISM Project that is an Army-wide Major Automated Information System (MAIS) initiative. The primary objective of ISM is to enhance, through automation, installation management functions. ISM applications consist of standard procedures packaged into functional applications that automate as well as integrate day-to-day installation processes. ISM applications use the Installation Level Integrated Data Base (ILIDB), which is the central repository for data that is common to more than one ISM application, and various local databases that contain data elements unique to the individual ISM applications.

The purpose of the DAMIS ISM is to automate installation-level support for identifying and tracking alcohol or other drug abusers. The system sponsor is the United States Army Drug and Alcohol Operations Agency (USADAOA). The users and operators of the system are the personnel employed at installation Alcohol and Drug Abuse Prevention and Control Programs (ADAPCP).

This system also provides installation commanders and Department of Defense (DOD) policy makers with statistical information on alcohol and other drug abuse in the Army and the effectiveness of the ADAPCP.

DAMIS provides current and historical information to those individuals responsible for monitoring the abuse of alcohol and other drugs and for determining whether the ADAPCP is an effective means of eliminating abuse and rehabilitating their personnel.

1.3 Document Overview. This document provides the instructions necessary for the implementation of the formal Interim Change Package (ICP) P6A-AVM-11-01-A of DAMIS. It informs the users of the changes made to the system and provides Point of Contacts (POCs) to be contacted in case of problems.

- 2. Referenced Documents.
- 2.1 Referenced Documents. This paragraph has been tailored out.
- 3. Version Description.
- 3.1 Inventory of Materials Released. This paragraph has been tailored out.
- 3.2 Inventory of Software Contents. Hardware platform ASIMS/ UNIX AIX OS users (Installation supported).

This change package contains the following files.

PROGRAM	VERSION	UPDATE
damis_1101.cpio.Z	1100	27 Dec 1999
README.damis_1101	1100	27 Dec 1999
install_damis_1101	1100	27 Dec 1999

- 3.3 Changes Installed.
- 3.3.1 Corrector Descriptions Technical.
- 1. ECP-S/E P6A-S600-009

A. CYCLES: None. B. PROGRAM: DAMIS

C. PROBLEM: Multiple ID records cannot be saved

from the patient identification process. Users cannot proceed to screen/enroll the patient into the

rehab/preventive program.

D. RESOLUTION: Modified the code so that it can

support multiple ID records.

E. ICP: P6A-AVM-11-01-A

- 3.3.2 Corrector Descriptions Functional. None.
- 3.3.3 Summary of Changes.
- a. Copy library member changes.
 - 1. Changed: None.
 - 2. Deleted: None.
 - 3. Added: None.

- b. Control library member changes.
 - 1. Changed: None.
 - 2. Deleted: None.
 - 3. Added: None.
- 3.4 Adaptation Data. This paragraph has been tailored out.
- 3.5 Related Documents.
- 3.5.1 Technical Documentation Changes. A new AIX version of Software Center Operator Manual (SCOM), AISM 25-P6A-AVM-AIX-SCOM dated 10 December 1999 has been issued. This current version of AISM 25-P6A-AVM-AIX-SCOM may be obtained from:
- U.S. Army Information Systems Software Center Executive Software Systems Directorate Attn: AMSEL-SE-IS-C, H-6. Fort Belvoir, VA 22060-5576.
- 3.5.2 Functional Manual Changes. A new AIX version of Software User Manual (SUM), AISM 25-P6A-AVM-AIX-SUM dated 01 December 1999 has been issued. This current version of AISM 25-P6A-AVM-AIX-SUM may be obtained from:
- U.S. Army Information Systems Software Center Executive Software Systems Directorate Attn: AMSEL-SE-IS-C, H-6. Fort Belvoir, VA 22060-5576.
- 3.6 Installation Instructions.

<u>Integrated Baseline</u>: In the integrated baseline, the applications are to be expanded on to the Golden Master before it is sent out. Therefore, there are no specific instructions on how to install. For all ISM applications you must run install_prg.

<u>Install Procedure:</u> This procedure installs ICP P6A-AVM-11-01 DAMIS R11.00 AIX version 4.2 operating system baseline onto the installation server. This portion of DAMIS R11.00 must be installed on each server at the installation.

STEP 1. Login with the login name of "root".

STEP 2. Select a drive on the system that contains at least 300 meg of available disk space. Change directory to that drive and create a directory called "ICP.1101". Place the following files for ICP 1101 in the directory ICP.1101.

damis_1101.cpio.Z 2354037 27 Dec 1999 install_damis_1101 2146 27 Dec 1999 README.damis 1101 1326 27 Dec 1999

STEP 3. Change directory to the start directory created in Step 2 and type:

chmod 777 install_damis_1101 <Enter>
./install_damis_1101 <Enter>

- STEP 4. The install_damis_1101 will complete the following:
 - a. Uncompress and uncpio the damis_1101.cpio.Z file.
 - b. Change the ownership of and copy the files in this ICP into the home directory of user "damis".
 - c. Record all output from each of the steps performed in a file named "damis_1101.log" located in the directory specified in Step 2.
- STEP 5. Results of the installation in damis_1101.log should be reviewed.
- 3.6.1 Installation Effective Date. This ICP should be immediately implemented upon receipt or NLT 30 days from date of receipt.
- <u>3.6.2 Security Implications</u>. This paragraph has been tailored out.
- 3.6.3 ANSOC Installation Instructions. All users receive the same baseline with a change package number through e-mail and Status Tracking and Reporting System (STARS) Bulletin Board System (BBS). This change package contains the following files:

Quantity File ID System Change Package No. 1 AIX OS 4.2 P6A-AVM-11-01-A README.damis_1101 install damis 1101

Ensure that all master file backups have been completed prior to loading this package.

Use these load instructions to develop load procedures that work best for your installation.

Due to various user configurations, each installation must determine appropriate block-size and library allocations. Users must not, repeat, must not, make changes to the files.

Security impact: None.

- 3.6.4 Special Installation Instructions All Users. None.
- 3.6.5 Point of Contact. If there are any problems or questions with the installation, or any shortage to the contents of this package, call the Army Network and Systems Operator Center (ANSOC), Ft. Huachuca: DSN 879-6798/6858 or 1-800-305-3046.
- 3.6.6 Report of Implementation. Implementation of this change package must be reported by completing the change package implementation form. This report must be sent to Ft. Huachuca using Fax or mail.
- 3.7 Possible Problems and Known Errors. This paragraph has been tailored out.
- 4. Notes
- 4.1 Notes. This paragraph has been tailored out.
